PROFESSIONAL SUMMARY

Experienced Software Developer with 9 years of expertise in building robust web development and scalable software solutions. Proven ability to design and build responsive web applications, implement efficient backend services, and craft intuitive UI/UX. Adept at full-stack development, database management (PostgreSQL, MongoDB), and agile methodologies, consistently delivering high-quality, impactful software. My experience includes developing applications for banking, healthcare, and data validation.

EXPERIENCE

Frontend developer

Jan 2022 – Present

Goldmann Systems · Bratislava, Slovakia

- Developed and maintained web and mobile applications for 365 bank, enhancing user experience and functionality.
- Contributed to the proposed 365 bank and Post Bank merger project, focusing on seamless integration of digital platforms.
- Implemented the Telemon telemedicine application, improving access to healthcare services through innovative web solutions.
- Developed specialized software for ambulances, functioning as a digital form to streamline data collection for medics.
- Mentored and supervised interns, providing code reviews and guidance to foster team growth and ensure high-quality deliverables.

Frontend developer

Jun 2019 – Dec 2021

Emprover · Kosice, Slovakia

- Developed a unified tools for data validation, data quality checks, and error detection for Clark Capital Management Group (CCMG).
- Implemented data filtering capabilities based on customized requirements to enhance data analysis.
- Generated clear, auto-created reports that served as a solid foundation for investment management decisions.

Fullstack developer

Aug 2017 – May 2019

IBM Slovakia · Bratislava, Slovakia

- Developed in-house applications to automate tasks for the BMS team, significantly improving operational efficiency.
- Created a Helpdesk application that reduced the number of support tickets, streamlining issue resolution.
- Built a centralized portal integrating various tools and a Slack messaging system to enhance team communication and accessibility.
- Implemented an error tracking tool to monitor and manage issues, improving system stability.
- Developed Time@IBM for tracking work hours and expenditures, optimizing resource management.
- Collaborated on projects utilizing .NET backends, integrating with various systems and databases.
